WORK EXPERIENCE

Software Engineer
Andela ↗

01/2019 – Present   *Kigali, Rwanda*

Andela builds distributed engineering teams with Africa's most talented software engineers.

Achievements/Tasks

- I work as a full-stack engineer in distributed engineering teams of leading tech companies in the United States of America.

Contact: Alpha Ogilo - Technical Program Lead – alpha.ogilo@andela.com

Web Developer and Administrator
Taarifa Rwanda ↗

03/2018 – 12/2018   *Kigali, Rwanda*

Taarifa is a Rwandan online news media house established to play role in shaping the global agenda through telling Africa's true stories by delivering quick, in-depth and exclusive news on issues and events affecting Africa's political, economic and social landscape.

Achievements/Tasks

- I was in charge of everything web-related (development, refactoring, deployment, etc) in a small team of two developers.
- Created and updated web pages and web ads. Monitored and analyzed the web performance using cutting edge technology tools.

Contact: Magnus Mazimpaka - Chief Editor – magnusmazimpaka@yahoo.ca

Android Developer
IT Consulting Group Ltd

05/2017 – 03/2018   *Kigali, Rwanda*

ITCG is an IT consulting company that provides software development services to public and private companies

Achievements/Tasks

- My work involved but not limited to the development of Android mobile applications for contractees.
- Worked on the integration of Africa's Talking SMS API.

Contact: Fabrice Niyomwungeri - Software Developer – niomwungeri.fabrice@gmail.com

EDUCATION

Bachelor of Business and Information Technology
University of Tourism, Technology and Business Studies. ↗

09/2014 – 05/2018   *Kigali, Rwanda*

SKILLS

Java EE · Javascript · Angular 2+ · ReactJS · NodeJS · HTML5 · CSS3 & SCSS · Java for Android · Android OS · Python · AWS · Docker · SQL & NoSQL databases · Firebase · RESTful API · WordPress

PERSONAL PROJECTS

Magic Tricks (02/2020 – Present) ↗

- An ongoing open-source project I undertook to automate manual daily tasks of software engineers. I mostly use Bash in shell scripting and sometimes Python.

Minimus (01/2020 – Present) ↗

- A minimalistic weather application built using Angular 9 with the new compiler and runtime environment (Angular Ivy). It consumes a backend built using Firebase. Weather data provide by OpenWeather API.

ACHIEVEMENTS

Seeds For The Future - Huawei Technologies (11/2018 – 01/2019) ↗

Huawei's international global flagship program that selects top students studying ICT-related subjects for a study trip to Huawei's headquarter in China.

Introduction to Cyber Attacks - New York University (01/2018 – Present) ↗

An online non-credit course authorized by New York University Tandon School of Engineering.
